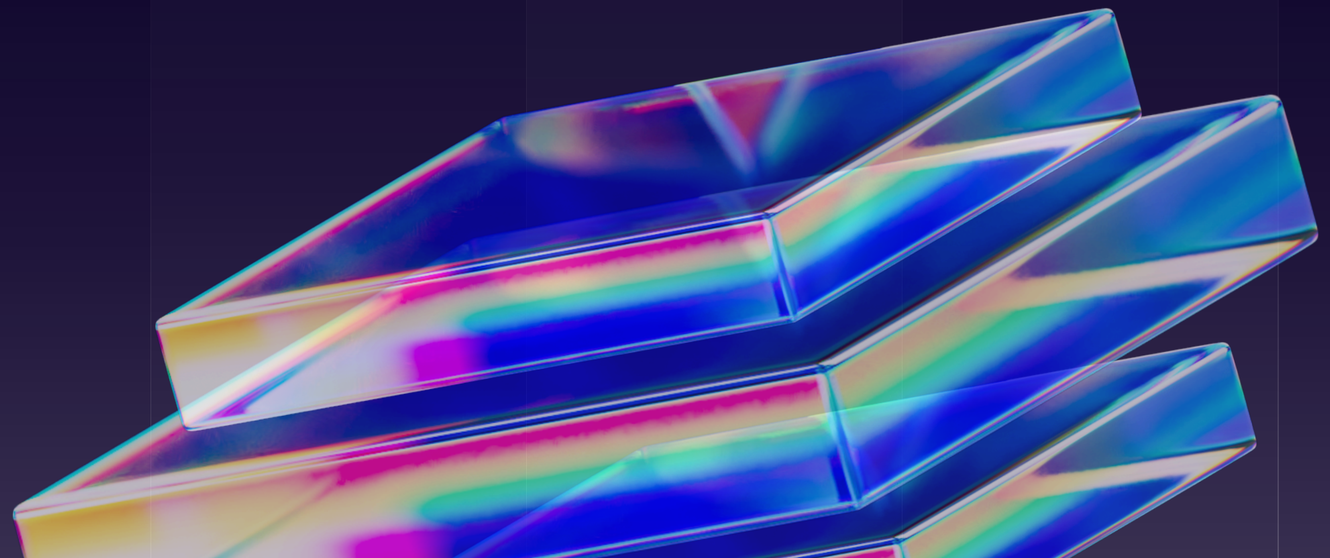
Future Forgers

KYRON



Future Forgers

Companies don’t fail because of bad ideas.

“They fail because execution breaks”

- Teams plan well, but execution falls apart
- Tasks are assigned, but not completed on time
- Deadlines exist, but delays still happen
- Managers spend more time following up than building

Execution is still manual, fragile, and dependent on humans

WHAT IF EXECUTION DIDN’T DEPEND ON HUMANS MANAGING IT?

Future Forgers

Existing Problem

Planning

- CLEAR PLANS ARE CREATED
- TASKS ARE ASSIGNED TO TEAMS
- DEADLINES ARE DEFINED

Execution

- NO CONSISTENT FOLLOW-UPS
- TASKS GET DELAYED OR IGNORED
- NO VISIBILITY INTO PROGRESS
- MANAGERS MANUALLY CHASE UPDATES

Future Forgers

Introducing KYRON
– The Autonomous Execution Engine

Just Give KYRON a goal, It ensures the job gets done

- No manual coordination
- No constant follow-ups
- No dependency on managers tracking work

KYRON THEN TAKES OWNERSHIP OF EXECUTION

Future Forgers

What can it do ?

Launching a Marketing Campaign

From strategy discussion to execution — plans campaign tasks, assigns teams, tracks deliverables, and ensures launch deadlines are met.

Integrates with

Social Media Content Pipeline

Plans content calendar, assigns creatives, tracks progress, and ensures consistent publishing without manual follow-ups.

Integrates with

Employee Onboarding Workflow

Coordinates onboarding steps — document submission, account setup, training tasks, and progress tracking automatically.

Integrates with

Legal & Compliance Review Process

Manages document review workflows, assigns stakeholders, tracks approvals, and ensures compliance deadlines are met.

Integrates with

Product Release Coordination

Aligns engineering, design, and marketing teams — ensuring tasks are completed, dependencies resolved, and releases happen on time.

Integrates with

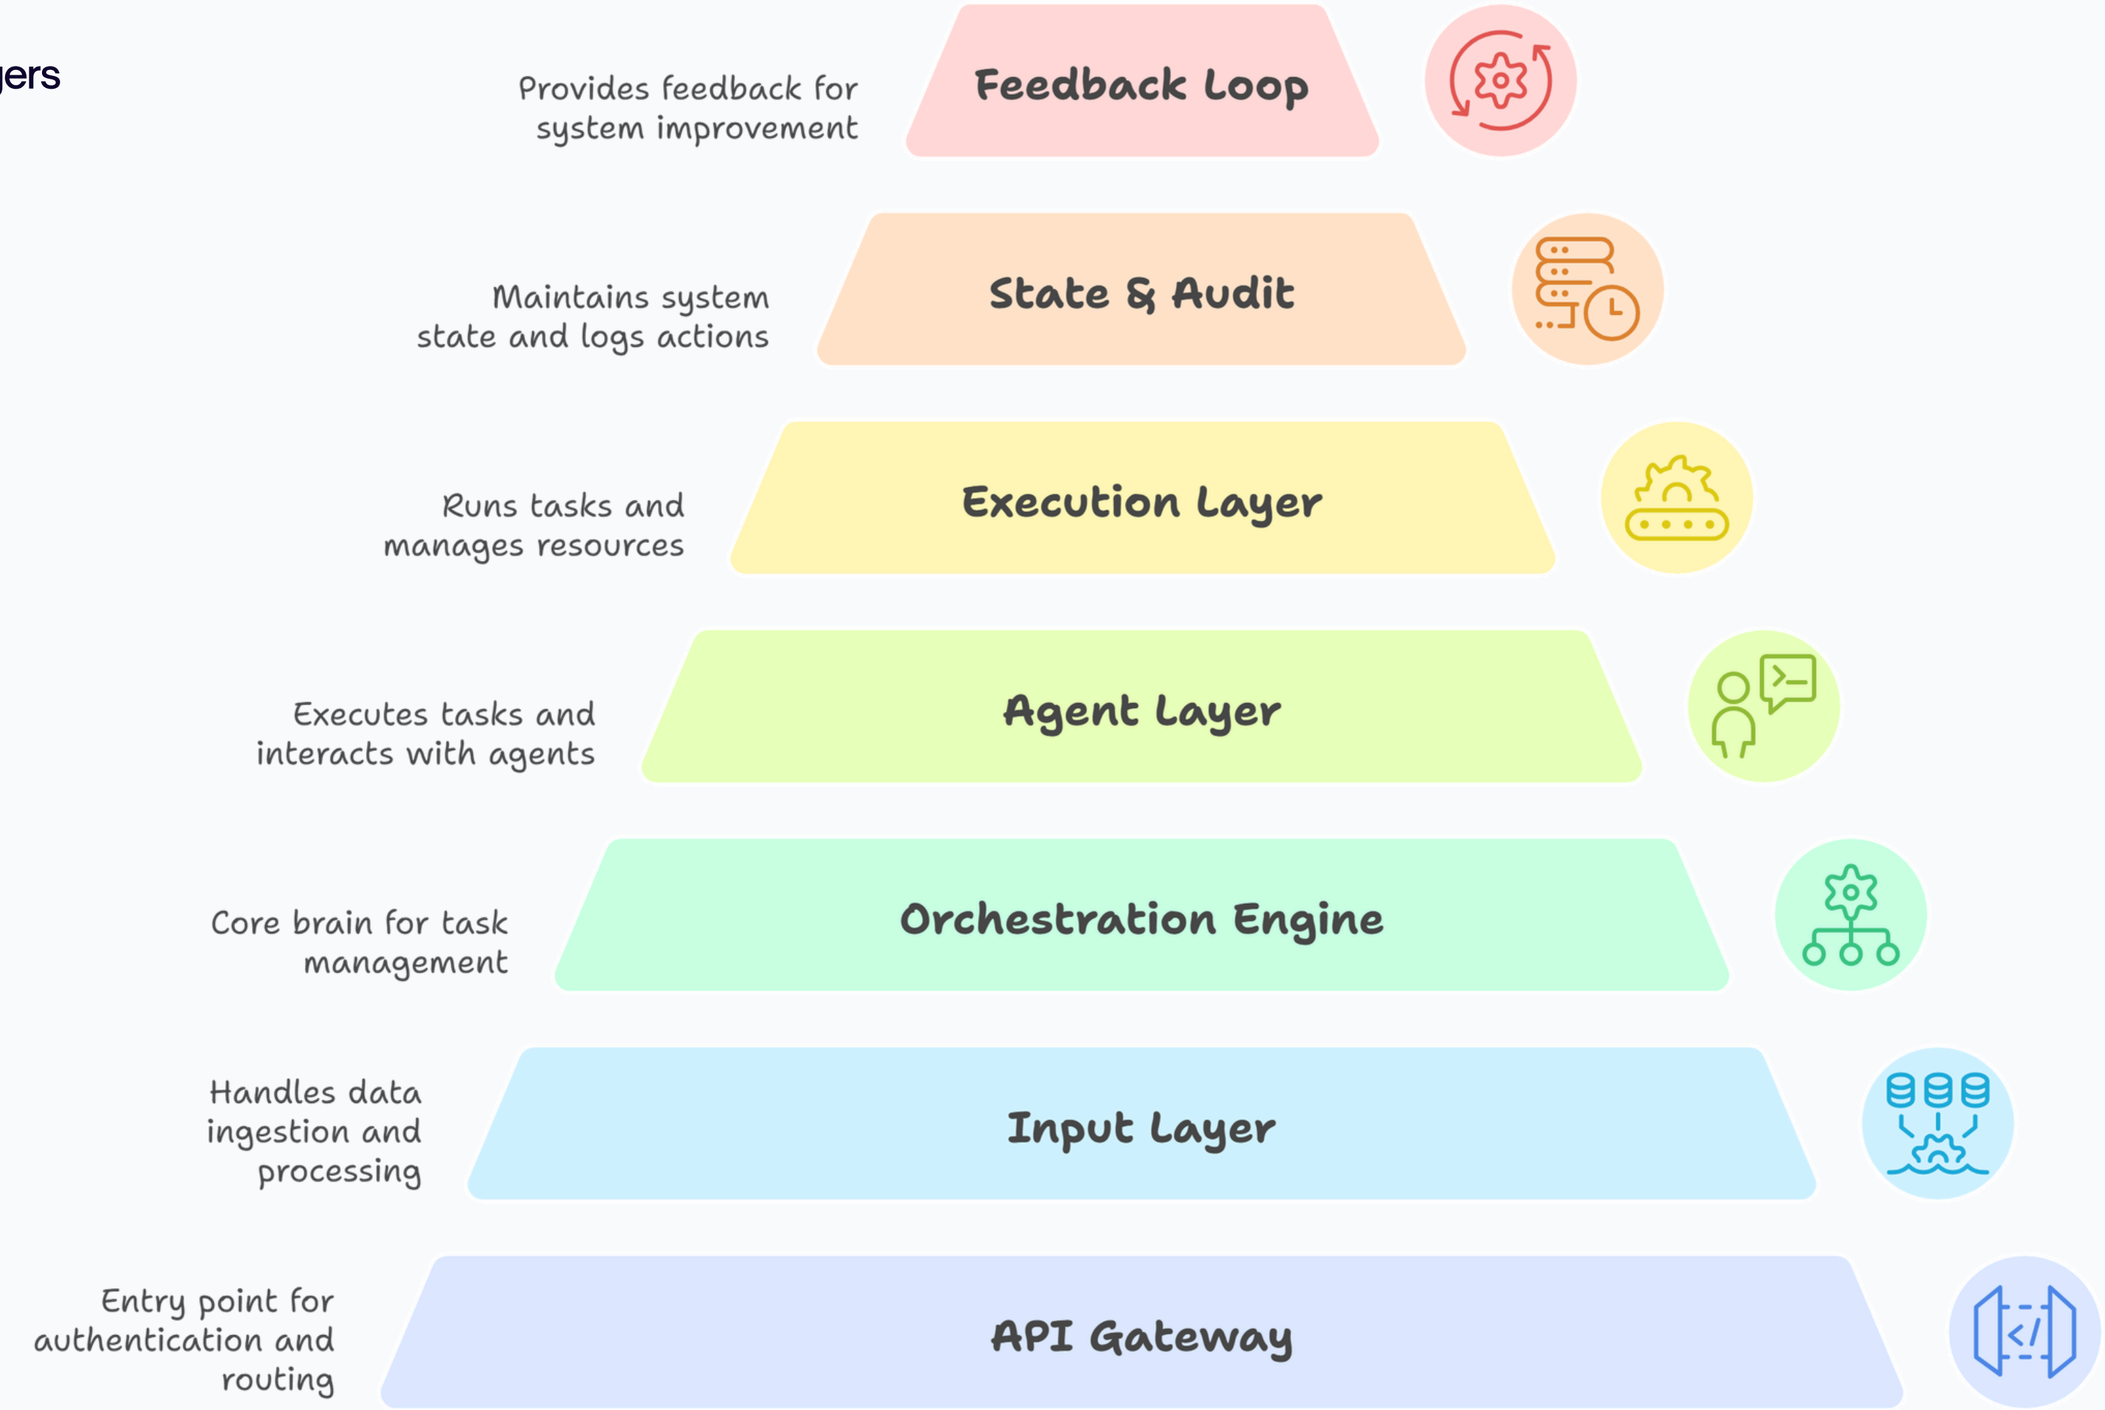
Client Delivery & Follow-Up System

Tracks client deliverables, ensures deadlines are met, sends updates, and follows up automatically until completion.

Integrates with

Future Forgers

Core system Architecture



Future Forgers

How does it work ?

Goal Input

- Directly Input goal via chat interface
- Send Meeting recording / transcription
- Can Attend Meetings Via LIVE AGENT MODE

Task planning

- Understands Decisions / Intent by converting into transcript
- Breaks Goal into actionable Tasks
- Uses Attention module

Smart Assignment

- Assigns tasks to employees based on :
  - employee skills
  - role
  - performance rating

Execution & Communication

- KYRON communicates directly via:
  - Email
  - WhatsApp
  - Slack / Teams
- Sends tasks, reminders, updates

Monitoring & Recovery

- Tracks progress in real-time
- Detects delays or failures
- Reassigns / adjusts plan automatically

KYRON doesn’t just stop at planning,

IT ENSURES COMPLETION

Future Forgers

Novelty

Why we say , KYRON is not just another AI tool , but a whole Execution Engine

Existing options

- Assist humans in managing work
- Static workflows
- Require manual follow-ups
- No real-time correction
- Fragmented tools
- No accountability

KYRON

- Owns and executes work
- Dynamic, adaptive execution
- Self-follow-ups automatically
- Detects & fixes failures
- Unified execution layer
- Full ownership of outcomes , with full auditibility of each and every decision

Future Forgers

Measurable Impact

80 + Hours a month
Time Saved

15 - 25%
Increase in Profit

₹400000
Saved in Operational Costs

3x
Work Efficiency

Thank You
